

How can we create successful and inviting places that people and cars can share – *and why does it matter?*

Because it's better for our...

- **ENVIRONMENT.** Carbon emissions and pollutants are reduced.
- **HEALTH.** Walking and bicycling keep us fit.
- **INCOME.** If a household can get by with one vehicle, then saving – such as for education or a mortgage – becomes possible.
- **FUTURE.** As we age, driving may become more challenging. Younger people are drawn to places where owning a car is not a necessity.
- **COMMUNITY.** When we walk and ride our bikes, there are more opportunities to stop and chat with friends and neighbors.
