

# Palmetto State Clean Fuels Coalition

The Palmetto State Clean Fuels Coalition (PSCFC) is part of the U.S. Department of Energy (DOE) Clean Cities program and is one of nearly a hundred designated coalitions in the United States.

Designated by the DOE in 2004, the PSCFC recognizes the commitment of our stakeholders to building an alternative fuels market in South Carolina.

The PSCFC is dedicated to promoting alternative fuels, fuel blends, advanced vehicles, hybrid vehicles, fuel economy, and idle reduction.

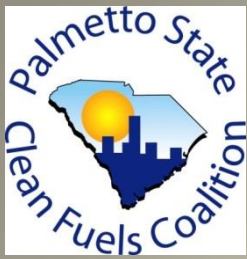

As a Clean Cities organization, the PSCFC strives to advance the nation's economic, environmental, and energy security by supporting local decisions to adopt practices that contribute to the reduction of petroleum consumption.

Idle Reduction

# Idling

- A. I turn off my engine every chance I get.
- B. I like to leave my climate controlled office and eat an hour long lunch in an idling car with the air and music blasted. And the fumes smell great!
- C. I support idle reduction measures in theory, but the car just gets so hot.
- D. No opinion either way.
